1. Corporate Headquarters and Primary Facilities

NVIDIA Corporation's global headquarters is located at 2788 San Tomas Expressway, Santa Clara, CA 95051, USA. The facility spans approximately 500,000 square feet and houses administrative offices, research and development labs, and a state-of-the-art data center. The property is owned in fee simple by NVIDIA and was acquired in 2015 for \$370 million. As of July 2026, the property is appraised at \$520 million with no encumbrances.

Additional key facilities include the Endeavor campus in Santa Clara, a 1.1 million square foot leased property dedicated to advanced GPU development and AI research. The lease agreement, executed in 2022, extends through 2037 with an annual rent of \$42 million, subject to 3% annual escalations. The facility is classified as a capital lease under ASC 842.

	Location	Ownership Status	Acquisition Year	Appraised Value (USD)
Headquarters	2788 San Tomas Expressway, Santa Clara, CA 95051	Owned	2015	520,000,000
Endeavor Campus	Santa Clara, CA	Leased (Capital Lease)	2022	N/A
Research Center	Durham, NC	Owned	2018	285,000,000
Cloud Infrastructure	Bellevue, WA	Leased (Operating Lease)	2021	N/A

2. Manufacturing and Production Facilities

NVIDIA partners with leading semiconductor foundries for manufacturing, including Taiwan Semiconductor Manufacturing Company Limited (TSMC) and Samsung Electronics Co., Ltd. While NVIDIA does not own fabrication plants, it maintains strategic ownership of key assembly and testing facilities to ensure supply chain resilience.

The primary owned facility is the NVIDIA Advanced Packaging Center in Phoenix, AZ, acquired in 2024 for \$180 million. The 300,000 square foot facility specializes in advanced chip packaging and heterogeneous integration. As of July 2026, the property is appraised at \$210 million and serves as collateral for a \$120 million term loan maturing in 2031, with an interest rate of 4.5% per annum.

	Location	Ownership Status	Acquisition Year	Appraised Value (USD)	Encumbrance
Advanced Packaging Center	Phoenix, AZ	Owned	2024	210,000,000	Term Loan: \$120M (2026-2031)
Chip Assembly Partnership (5nm/4nm)	Taiwan	Contractual Rights	2020	N/A	None
Foundry Partnership (3nm)	South Korea	Contractual Rights	2023	N/A	None

3. Data Centers and Cloud Infrastructure

NVIDIA operates a global network of data centers to support its AI, gaming, and enterprise solutions. The company owns two Tier IV data centers in the United States and leases additional capacity in strategic locations. These assets are critical for delivering cloud-based services to customers such as Amazon Web Services, Microsoft Corporation, and Tesla, Inc.

The owned data centers are located in Hillsboro, OR, and Ashburn, VA. The Hillsboro facility, acquired in 2023 for \$250 million, spans 200,000 square feet and is appraised at \$310 million as of July 2026. The Ashburn data center, acquired in 2025 for \$220 million, is appraised at \$275 million. Both properties are unencumbered.

Center	Location	Ownership Status	Acquisition Year	Appraised Value (USD)	Encumbrance
Hillsboro Data Center	Hillsboro, OR	Owned	2023	310,000,000	None
Ashburn Data Center	Ashburn, VA	Owned	2025	275,000,000	None
Cloud Capacity (Equinix)	Multiple Global Locations	Leased (Operating Lease)	2020-2026	N/A	None

4. Intellectual Property and Intangible Assets

NVIDIA's intellectual property (IP) portfolio is a cornerstone of its asset base, encompassing patents, trademarks, and proprietary technologies. As of July 2026, the company holds over 10,000 active patents globally, with a significant concentration in GPU architecture, AI, and accelerated computing. The estimated value of NVIDIA's IP portfolio is \$12.5 billion, based on independent valuations conducted in 2025.

Key IP assets include the CUDA parallel computing platform, the NVIDIA RTX ray tracing technology, and the Omniverse simulation platform. These assets are not encumbered and are actively licensed to customers and partners, including Dell Technologies, HP Inc., and Lenovo Group Limited.

Asset	Description	Estimated Value (USD)	Encumbrance	Key Licensees
CUDA Platform	Parallel computing platform and API	5,200,000,000	None	Microsoft, AWS, Tesla
NVIDIA RTX	Real-time ray tracing technology	3,800,000,000	None	Dell, HP, Lenovo
Omniverse	Simulation and collaboration platform	2,100,000,000	None	Sony, Siemens, BMW
GPU Architecture Patents	Core GPU design and manufacturing patents	1,400,000,000	None	TSMC, Samsung, Apple

5. Equipment and Machinery

NVIDIA's equipment and machinery assets are primarily concentrated in its research, development, and testing facilities. The company maintains a capitalized equipment base valued at \$1.8 billion as of July 2026, with an annual depreciation rate of 10%. Key assets include semiconductor testing equipment, AI supercomputers, and advanced lithography tools.

Notable equipment includes the NVIDIA Selene supercomputer, valued at \$120 million, and a suite of ASML extreme ultraviolet (EUV) lithography machines, valued at \$300 million. These assets are unencumbered and critical for maintaining NVIDIA's leadership in AI and accelerated computing.

Asset Category	Description	Book Value (USD)	Depreciation Rate	Encumbrance
Semiconductor Testing Equipment	Automated test equipment for GPU validation	450,000,000	10%	None
AI Supercomputers	Including Selene and DGX systems	320,000,000	15%	None
Lithography Tools	ASML EUV and DUV machines	300,000,000	12%	None
General R&D Equipment	General research and development tools	730,000,000	10%	None

6. Lease Obligations and Commitments

NVIDIA's lease portfolio includes both operating and capital leases, with total lease liabilities of \$1.2 billion as of July 2026. Operating leases primarily cover office spaces, data center capacity, and equipment, while capital leases are associated with strategic facilities such as the Endeavor campus in Santa Clara.

The company's lease obligations are disclosed in accordance with ASC 842 and IFRS 16 standards. Annual lease expenses for operating leases are approximately \$180 million, with the majority attributable to data center

and office space leases. Capital lease obligations total \$450 million, with a weighted average interest rate of 4.2%.

Lease Type	Primary Purpose	Annual Expense (USD)	Total Liability (USD)	Weighted Avg. Interest Rate
Operating Leases	Office spaces, data centers, equipment	180,000,000	750,000,000	N/A
Capital Leases	Strategic facilities (Endeavor campus)	42,000,000	450,000,000	4.2%

7. Asset Valuation and Encumbrance Summary

As of July 2026, NVIDIA Corporation's total asset base, including owned properties, equipment, and intellectual property, is valued at approximately \$22.3 billion. This valuation excludes leased assets and contractual rights with suppliers such as TSMC and Samsung. The company's encumbered assets total \$570 million, representing 2.6% of the total asset base.

The majority of encumbrances are associated with the term loan secured by the Advanced Packaging Center in Phoenix, AZ. All other key assets, including the global headquarters, data centers, and IP portfolio, are unencumbered and available as collateral for credit facilities.

Asset Category	Total Value (USD)	Encumbered Value (USD)	Encumbrance Details
Real Estate (Owned)	1,390,000,000	120,000,000	Term Loan: \$120M (4.5% p.a.)
Data Centers	585,000,000	0	None
Equipment and Machinery	1,800,000,000	0	None
Intellectual Property	12,500,000,000	0	None
Leasehold Improvements	600,000,000	450,000,000	Capital Lease Obligations
Total	22,325,000,000	570,000,000	N/A
