

Tesla Inc. - Asset Details Report

tesla

Prepared on 2026-07-18T13:43:39

1. Company Overview

Tesla Inc. (registered as Tesla Motors, Inc. until 2017) is a leading American manufacturer of electric vehicles, energy storage systems, and solar products. Headquartered at 1 Tesla Road, Austin, Texas, 78725, USA, Tesla operates globally with a strong presence in North America, Europe, and Asia. Incorporated in 2003, Tesla has revolutionized the automotive and energy sectors through innovation and vertical integration.

The company's Permanent Account Number (PAN) is TESLA1234G, and its Corporate Identification Number (CIN) is C0278187. Tesla is not registered under GST in India (GSTIN: N/A) due to its primary operations being based in the USA. As of July 2026, Tesla's annual revenue stands at \$96.774 billion, with an EBITDA of \$15 billion and a net worth of \$60 billion.

2. Fixed Assets

Tesla's fixed assets form the backbone of its manufacturing and operational capabilities. The company's primary production facilities include:

- ****Gigafactory Texas (Austin, USA)****: A 10-million-square-foot facility producing Model Y, Cybertruck, and 4680 battery cells. Estimated value: \$5.5 billion.
- ****Gigafactory Berlin-Brandenburg (Germany)****: Focused on Model Y production and battery manufacturing. Estimated value: \$4.2 billion.
- ****Gigafactory Shanghai (China)****: Produces Model 3 and Model Y for the Asian market. Estimated value: \$3.8 billion.
- ****Gigafactory Nevada (USA)****: Joint venture with Panasonic for battery cell production. Estimated value: \$3.1 billion.
- ****Fremont Factory (California, USA)****: Original manufacturing hub for Model S, Model X, Model 3, and Model Y. Estimated value: \$2.7 billion.

Additional fixed assets include solar farms (e.g., SolarCity projects), Supercharger networks, and research facilities like the Tesla Advanced Automation Germany (TAAG) center.

Asset Type	Location	Estimated Value (USD)	Primary Use
Gigafactory Texas	Austin, USA	5.5B	Vehicle and battery production
Gigafactory Berlin	Grünheide, Germany	4.2B	Model Y and battery production
Gigafactory Shanghai	Shanghai, China	3.8B	Model 3/Y for Asian markets
Gigafactory Nevada	Sparks, USA	3.1B	Battery cell production (JV with Panasonic)
Fremont Factory	Fremont, USA	2.7B	Model S/X/3/Y assembly

3. Current Assets

Tesla's current assets reflect its liquidity and short-term financial health. Key components include:

- **Cash and Cash Equivalents**: \$21.3 billion, including short-term investments in U.S. Treasury securities and money market funds.
- **Accounts Receivable**: \$12.4 billion, primarily from sales to enterprise customers such as Amazon.com, Inc., Ford Motor Company, and Apple Inc. Payment terms typically range from 30 to 90 days.
- **Inventory**: \$10.7 billion, comprising raw materials (e.g., lithium, nickel, cobalt), work-in-progress (battery cells, vehicle sub-assemblies), and finished goods (Model 3, Model Y, Cybertruck).
- **Prepaid Expenses and Other Current Assets**: \$3.2 billion, including advance payments to suppliers like CATL and LG Chem for battery components.

Asset Category	Value (USD)	Key Details
Cash and Cash Equivalents	21.3B	Includes short-term investments and money market funds
Accounts Receivable	12.4B	Due from Amazon, Ford, Apple, Uber, and Lyft
Inventory	10.7B	Raw materials, WIP, and finished vehicles
Prepaid Expenses	3.2B	Advance payments to CATL, LG Chem, and Panasonic

4. Intellectual Property and Intangible Assets

Tesla's intellectual property (IP) portfolio is a critical driver of its competitive advantage. Key assets include:

- **Patents**: Over 3,500 active patents covering battery technology (e.g., 4680 cells, tabless electrode design), autonomous driving (Full Self-Driving software), and manufacturing processes (e.g., gigacasting). Estimated value: \$12 billion.
- **Trademarks**: Registered trademarks for Tesla, Model S, Model 3, Model X, Model Y, Cybertruck, Powerwall, Powerpack, and Solar Roof. Estimated value: \$4.5 billion.
- **Software**: Proprietary software for vehicle operating systems (Tesla OS), energy management (Autobidder), and AI-driven manufacturing (Optimus robotics). Estimated value: \$8.3 billion.
- **Brand Value**: Tesla's brand is valued at \$66.2 billion (as of 2026), reflecting its market leadership in EVs and energy solutions.

IP Type	Estimated Value (USD)	Key Examples
Patents	12B	4680 battery cells, FSD software, gigacasting
Trademarks	4.5B	Tesla, Model S/X/3/Y, Cybertruck, Powerwall
Software	8.3B	Tesla OS, Autobidder, Optimus robotics
Brand Value	66.2B	Market leadership in EVs and energy

5. Customer and Supplier Relationships

Tesla's customer base includes Fortune 500 companies and leading mobility providers. Top customers by revenue contribution:

- **Amazon.com, Inc.**: Procures Tesla Semi trucks for logistics and Model Y vehicles for corporate fleets. Annual spend: ~\$1.8 billion.
- **Ford Motor Company**: Partners with Tesla for Supercharger network access and battery technology. Annual spend: ~\$1.2 billion.
- **Apple Inc.**: Uses Tesla vehicles for corporate transportation and energy storage solutions. Annual spend: ~\$900 million.

- **Uber Technologies, Inc. and Lyft, Inc.:** Fleet operators for ride-hailing services. Combined annual spend: ~\$1.5 billion.

Key suppliers include:

- **Panasonic Corporation:** Battery cells for Model 3/Y and energy products. Annual spend: ~\$4.5 billion.

- **CATL:** Lithium iron phosphate (LFP) batteries for standard-range vehicles. Annual spend: ~\$3.2 billion.

- **LG Chem Ltd.:** High-nickel battery cells for long-range vehicles. Annual spend: ~\$2.8 billion.

- **BHP Group and Albemarle Corporation:** Supply lithium, nickel, and cobalt for battery production. Combined annual spend: ~\$2.1 billion.

Customers	Annual Spend (USD)	Key Products/Services
Amazon.com, Inc.	1.8B	Tesla Semi, Model Y fleets
Ford Motor Company	1.2B	Supercharger access, battery tech
Apple Inc.	900M	Corporate vehicles, energy storage
Uber Technologies, Inc.	800M	Fleet vehicles
Lyft, Inc.	700M	Fleet vehicles
Suppliers	Annual Spend (USD)	Key Materials/Products
Panasonic Corporation	4.5B	Battery cells
CATL	3.2B	LFP batteries
LG Chem Ltd.	2.8B	High-nickel battery cells
BHP Group	1.2B	Lithium, nickel
Albemarle Corporation	900M	Lithium, cobalt

6. Financial Health and Credit Metrics

Tesla's financial health supports its requested credit limit of \$25 million. Key metrics include:

- **Revenue:** \$96.774 billion (FY 2025), with a compound annual growth rate (CAGR) of 28% over the past 5 years.

- **EBITDA:** \$15 billion (FY 2025), reflecting strong operational efficiency and scalability.

- **Net Worth:** \$60 billion, driven by retained earnings and equity financing.

- **Debt-to-Equity Ratio:** 0.32, indicating a conservative capital structure.

- **Current Ratio:** 1.8, demonstrating strong liquidity to cover short-term obligations.

- **Interest Coverage Ratio:** 18.5, highlighting Tesla's ability to service debt comfortably.

Metric	Value	Benchmark
Revenue (FY 2025)	96.774B	28% CAGR (5-year)
EBITDA (FY 2025)	15B	15.5% margin
Net Worth	60B	Retained earnings + equity
Debt-to-Equity Ratio	0.32	<1.0 (conservative)
Current Ratio	1.8	>1.5 (healthy)

Metric	Value	Benchmark
Interest Coverage Ratio	18.5	>3.0 (strong)

7. Board of Directors and Key Personnel

Tesla’s board of directors provides strategic oversight and governance. Key members include:

- **Elon R. Musk**: Technoking of Tesla and CEO. Founder and largest shareholder with a 13% stake. Oversees product design, engineering, and long-term vision.
- **Robyn M. Denholm**: Chair of the Board and Independent Director. Former CFO of Juniper Networks. Focuses on corporate governance and financial oversight.
- **Ira Ehrenpreis**: Lead Independent Director. Managing Partner at DBL Partners. Specializes in clean energy and venture capital.
- **Kimbal Musk**: Independent Director. Co-founder of The Kitchen Restaurant Group and Square Roots. Focuses on sustainability and food systems.
- **James Murdoch**: CEO of Lupa Systems. Former CEO of 21st Century Fox. Provides expertise in media, technology, and global expansion.

Name	Role	Background	Focus Areas
Elon R. Musk	Technoking & CEO	Founder, SpaceX, Neuralink	Product design, engineering, vision
Robyn M. Denholm	Board Chair	Former CFO, Juniper Networks	Governance, financial oversight
Ira Ehrenpreis	Lead Independent Director	Managing Partner, DBL Partners	Clean energy, venture capital
Kimbal Musk	Independent Director	Co-founder, The Kitchen	Sustainability, food systems
James Murdoch	Independent Director	CEO, Lupa Systems	Media, technology, global expansion

8. Requested Credit Limit and Utilization Plan

Tesla requests a credit limit of \$25 million to support the following initiatives:

- **Expansion of Gigafactory Texas**: Additional \$10 million allocated for tooling and automation upgrades to increase Cybertruck production capacity by 50%.
- **Battery Technology R&D**: \$8 million earmarked for development of next-generation 4680 cells and solid-state battery prototypes in collaboration with Panasonic and CATL.
- **Supplier Prepayments**: \$5 million to secure critical raw materials (lithium, nickel) from BHP Group and Albemarle Corporation, ensuring supply chain stability.
- **Sustainability Projects**: \$2 million for solar panel installations at Gigafactory Berlin and Nevada to reduce energy costs by 15%.

The credit facility will be repaid within 24 months using operating cash flows, with an estimated interest rate of 4.5% per annum. Collateral may include accounts receivable and inventory.

Initiative	Allocated Amount (USD)	Expected Outcome
Gigafactory Texas Expansion	10M	50% increase in Cybertruck production
Battery Technology R&D	8M	Next-gen 4680 cells, solid-state prototypes
Supplier Prepayments	5M	Secured lithium/nickel supply

Initiative	Allocated Amount (USD)	Expected Outcome
Sustainability Projects	2M	15% reduction in energy costs
